## EXTRACT FROM STATUS REPORT # 5

DATE: 4 Jan 52

TIME (Local): 0500

LCCATION: Travis AFB, Colif.

LENGTH OF TIME OBSERVED: 15-30 Sec.

SOUND: None

SPEED: Same as jet a/c

ALTITUDE: LOW

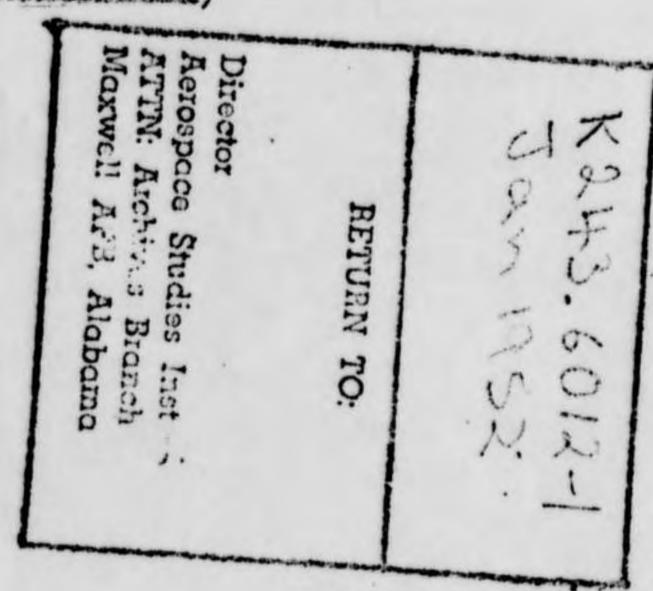

HEADING: 900

SOURCE: Airman

ACTION OR COMMENTS: Description resembled large meteor.

DESCRIPTION OF INCIDENT: Source observed bright green tear drop shaped object descending through a cloud cover. The object had a long trail of red flame which seemed to shoot out

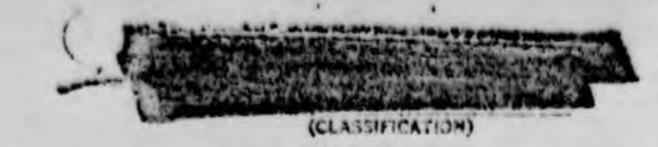

large colored sparks. (Remained)

## AIR INTELLIGENCE INFORMATION REPORT

FRUM (Agency)	REPORT NO.				
He & He Se, 5th Strat Ren Wg, (H) Travis Air Force Base, Calif.	8	PAGE 2	OF	5	PAGES

The following report is submitted as the result of an interview with Pfe Clifford W. Smith, AF1631394, Wil th Armement and Miscoronics Soundron, 5th Strategic Reconnaissance Wing, Heavy, Travis Air Force Rase, Colifornia, on 5 January 1952:

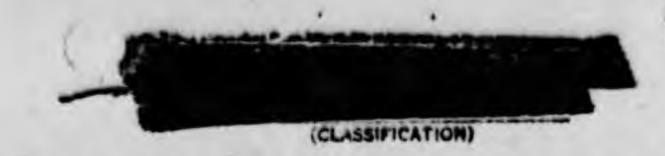

Cr + January 1952 between the hours of 0500 and 0530 the informant sighted that reperred to be an undentified flying object. The weather during the time of sighting was very dark out clear, the moon was not visible however a high, broken, overcast was observed over the pror. Smith was alone at the time and there were no nearby witnesses seen in the vicinity. He was walking eact on Provis Avenue in front of the Wherry Housing Area when he sighted the unidentified object heading on a relative bearing approximately to ty-five (45) degrees to the helt about one-quarter (t) mile distance at an estimated eltitude of three hundred (500) feat. The unidentified sighting appeared to be roing forward and downward at an extremel; his harde of speed described as being comerable to that of a jet type sirerest coming down from out of the clouds. To Smith the unicentified object appeared to be a tear drop shaped apportition very bright green in color lighting up a large area at the time. A red flame estimated as about thirty (30) fort long shooting out large phosphorent calored sparks appeared to the observer to be coming from the rear of the unidentified object. During the pariod of sighting between fifteen (15) to thirty (30) seconds the unidentified object seemed to Smith to descend about fifty (50) feet in altitude from the initial sightline position. There was no sound heard or crack observed during the sighting time. The observer stated he is familier with the represence of Meteors and shooting stars and that the unidentified object he sighted had no resemblance to either of the faregoing.

FROM (Literacy)	REPORT NO.					
He & He Se, 5th Strat Ren Wg, (H)	S	PAGE	2	OF	2	PAGES
Travis Air Force Base, Calif.		PAGE	E .	OF		

The following report is submitted as the result of an interview with Pfc.

411. th Armament and Electronics Squadron, 5th

Strategic Reconnaissance Wing, Heavy, Travis Air Force Base, California, on 5

January 1952:

. On 4 January 1952 between the hours of 0500 and 0530 the informant sighted what appeared to be an undentified flying object. The weather during the time of sighting was very dark but clear, the moon was not visible however a high, broken, overcast was observed over the area. was alone at the time and there were no nearby witnesses seen in the vicinity. He was walking east on Travis avenue in front of the Wherry Housing Area when he sighted the unidentified object heading on a relative bearing approximately forty-five (45) degrees to the left about one-quarter (;) mile distance at an estimated altitude of three hundred (300) feet. The unidentified sighting appeared to be going forward and downward at an extremely high rate of speed described as being comparable to that of a jet type aircraft coming down from out of the clouds. To the unidentified object appeared to be a tear drop shaped apparition very bright green in color lighting up a large area at the time. A red flame estimated as about thirty (30) fest long shooting out large phosphorent colored sparks-appeared to the observer to be coming from the rear of the unidentified object. During the period of sighting between fifteen (15) to thirty (30) seconds the unidentified object seemed to Smith to descend about fifty (50), feet in altitude from the initial sighting position. There was no sound heard or crash observed during the sighting time. The observer stated he is familiar with the appearance of Meteors and shooting stars and that the unidentified object he sighted had no resemblance to either of the foregoing.

it In the the NORTHWESTERN UNIVERSITY EVANSTON, ILLINOIS 60201 DEPARTMENT OF ASTRONOMY LINDHEIMER ASTRONO HOME KUSE RCH CENTER 4 June 1968 FTD (TDETR) Research and Aerial Phenomena Division Wright Patterson Air Force Base Ohio 45433 TDPT (UFO) Attn: Subj: UFO Investigation Lt. Col. Hector Quintanilla, Jr. To: Reference: I. Your letter 22 May 1968, subject, UFO Invest actions, I have the following comments on all the cases you have listed, in the order they were listed. 1. 7 January 1952, Palmer, Alaska. I have rated this case 23 C7, meaning that as far as strangeness was concerned, the stimulus giving rise to this report could have been something quite ordinary or it could have fallen into the category of "cigar-shaped Ufos" reported from many countries and which have no ready explanation. In this instance, there is not sufficient information to go on. The report we have states, "Alaska Air Command informed and will take further investigative action," and, "additional data will be forwarded when available". To the best of my knowledge the further data were never transmitted. This plus the fact that it was reported by one woman out of 4 or 5 (not 45 as the original report stated) and the fact that it was observed at the time of the setting sun, leads me to think that the sighting might have had a meteorlogical origin. Thus, "ossibly meteorological, but data insufficient for firm evaluation" is my recommendation for this classification. 14 April 1952, LaCrosse, Wisconsin. I originally asked to review this case in the hopes that unknown to me some additional followup had been made. I found that despite the fact that a captain of commercial airliner and others -1-
